# District Objectives

- In all schools, at all grade levels, we are interested in increasing the percentage of students in the advanced proficient range and decreasing the number of students in the partially proficient range.
- Schools will set priorities and identify specific growth objectives.
- The objectives fall into three categories:
  - Increasing the number of general education students and special education students in meeting and exceeding expectations
  - Decreasing the number of general education students in partially and approaching expectations
  - Decreasing the number of special education students in partially and approaching expectations

# Strategies

- Determine level of proficiency required for 2016-2017 administration of New Jersey mandated State standardized tests
- Develop specific district growth objectives to meet the needs of all students to achieve proficiency
- Identify sub-groups in each school who are ‘at-risk’ for not meeting adequate yearly progress
- Identify academic programs, resources, technology, and personnel needed to achieve objectives

# What will we do to improve instruction?

- Implementation of curriculum and instructional strategies aligned to the Common Core State Standards and the Core Curriculum Content State Standards
- Ongoing analysis of quarterly benchmark test data to drive group and/or individual instructional decisions
- Implementation of Data Teams comprised of teachers and administrators to analyze quarterly student performance data

# What will we do to improve instruction? (continued)

- Systematic staff development to increase teachers' and administrators' content knowledge, and understanding of test format and response construction, focusing on writing, reading comprehension, and mathematics
- Implementation of monthly special education meetings with teachers and building administrators that focus on providing support to enhance student achievement
- Targeted professional development focusing on English/Language Arts and Mathematics intervention strategies
